EDUCATION

University of British Columbia

Sep 2022 – May 2027 (Expected)

BSc in Computer Science and Mathematics (Co-op) — GPA: 85%

Vancouver, BC

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, SQL, Go, Java, C++

Backend & APIs: Django (familiar), FastAPI, Node.js, REST APIs, Microservices

Frontend: React, TypeScript

Databases: PostgreSQL, MongoDB, MySQL, SQLite, pgvector, Redis

Cloud & Systems: AWS (S3), Docker, CI/CD (GitHub Actions), Distributed systems

WORK EXPERIENCE

Software Developer Co-op

May 2025 – December 2025

Miru Smart Technologies

Vancouver, BC

- Developed and maintained backend services for a production LIMS platform, processing **10,000+ records** with reliable real-time data access.
- Optimized **SQL queries and database design**, improving performance and responsiveness of data-intensive workflows.
- Enhanced **CI/CD pipelines and automated testing**, reducing deployment failures by **25%** and improving system reliability.

Software Developer Intern

Aug 2024 – Jan 2025

Viettel High Tech

Ha Noi, Viet Nam

- Built **Python-based ETL pipelines** integrating MinIO (S3), Airflow, and Redis, processing **thousands of records per run**.
- Improved pipeline reliability and latency by **20%** through optimized workflows and monitoring design.
- Implemented **Prometheus and Grafana monitoring** across **6+ services**, enabling efficient debugging and performance analysis.

Math Teaching Assistant

Sep 2023 – Dec 2023

University of British Columbia

Vancouver, BC

- Led weekly tutorial sessions for **30+ students**, teaching systematic problem-solving and debugging logical errors in mathematical proofs and computations.
- Mentored students through structured solution strategies across **10+ tutorial sessions**, improving understanding of core concepts in calculus.

PROJECTS

ThreadSense | *React, FastAPI, Supabase, pgvector*

Sep 2025 – Present

- Led backend development for an **AI-powered study assistant**, building FastAPI services to process and retrieve large-scale discussion data.
- Designed scalable **APIs and data pipelines** (pgvector, Supabase) enabling semantic search and low-latency querying.
- Integrated backend services with a React frontend, ensuring reliable end-to-end data flow and system performance.

SectionInsight | *TypeScript, Node.js, REST APIs*

Sep 2024 – Dec 2024

- Built a fullstack system for querying and validating structured datasets, implementing REST APIs for filtering, aggregation, and transformations.
- Developed robust query parsing and execution logic to handle complex data operations across large datasets.
- Designed a **comprehensive automated testing framework (2,000+ cases)** to ensure correctness, reliability, and edge-case handling.

ACHIEVEMENTS

Dean's List

September 2022 – Present

Outstanding International Student Scholarship

Apr 2022

University of British Columbia

Vancouver, BC
